LINK AMERICAN STANDARD

Scope of Application

The LINK New Locking Plug Boots are designed to cover and protect the latch on RJ45 plugs. Made from a special PC material, they provide secure protection and locking for each plug. These boots make it easier to locate cable ends during maintenance or relocation and help organize your patch cord system efficiently. They are suitable for field termination, patch cord assembly, and unshielded plugs.

Drawing

Technical Standard

- RoHS Compliant
- UL94V-2
